THE BROOKLYN OPTICA DIFFERENCE

Brooklyn Optica always strives for exceptional professional service excellence.

During the routine visual examination, our optometrists not only ascertain the best possible prescription for your eyes, but also do an eye health check. Should it be necessary, you will be referred to an ophthalmologist for further health investigation.

Our cutting edge technology instrumentation will screen for retinal and macular anomalies as well as glaucoma. It is recommended that you have your eyes examined every two years. In the ever changing world of technology and style, Brooklyn Optica keeps up to date with new developments. Lens designs change frequently, materials are enhanced and of course frame styles change.

Our extensive selection of frames include brands like: Lindberg (our flagship brand), Chanel, Porsche, Tom Ford, Mykita, Silhouette and Oakley to name a few. We also stock a wide price range in frames starting from R199.00.

As with all products from cars to perfume, spectacle frames and lenses are available in a variety of price categories. For instance:

- The same lens manufacturer will produce entry level as well as superior, individually designed multifocal lenses.
- We will always endeavour to produce a final product that will suit your requirements as well as your pocket.
