

THE LINK BETWEEN SEASONAL ALLERGENS AND DRY EYE

Red, watery eyes are the hallmark of both allergies and dry eye. For a long time scientists thought of these conditions as separate, but it turns out they may have something in common: the seasons.

Dry eye can significantly impact a person's quality of life by inducing burning, irritation and blurred vision. This common condition affects about 1 in 5 women and 1 in 10 men.

EXCITING NEWS!

We are now an international Hoya Centre. In appreciation of our continued support and commitment to drive best optics in our practice and to our patients, Hoya has recognised us as part of their global network of practices known as Hoya Centre's. The Hoya Centre network is made up of a select group of independent practices dedicated to providing optical excellence. It is a collaborative partnership between Hoya and our practice to give peace of mind to you, our patient, ensuring your eye care needs are in the best possible hands. As part of this new partnership we are offering our patients the following promotion until end of November 2016:

Buy any pair of Id Lifestyle V+ Xact or Id MyStyle V+ multifocal lenses with specific AR coating / Sensity Photochromic and receive a second pair of lenses free!

The second pair can be office or single vision reading/distance lenses in 1.5 index with different coating options. Extras can be added at a special promotional price.
